

Java Software Engineer

POSITION SUMMARY

Are you a Java Software Engineer who loves a wide variety of challenges? Do you enjoy using a variety of tools and technologies to solve problems? Do you want to be part of an exciting, innovative, and fast paced growing software company? Do you value delivering highly scalable and the highest quality software?

Our Research & Development organization is looking for a highly motivated Java Software Engineer who will help the company advance our software to the next level of quality and scalability by designing, implementing, and creating products that work in a web based, multi-tenant, secure cloud environment.

WHAT YOU'LL DO:

Work with people whose passion for creating outstanding software matches yours. Collaborate, brainstorm and work in an interactive, dynamic and rewarding environment that will challenge your skills and help you achieve the next level of your career.

You will have the opportunity to work on a web based software suite that has not only set a new standard for call center software, but has driven innovation within the entire industry. You will also be able to participate on a highly skilled team of other Software Engineers who redefining our market space.

If you enjoy being challenged, and want to take your skills to the next level, then Calabrio is what you have been looking for.

IF YOU HAVE THESE SKILLS, CALABRIO IS LOOKING FOR YOU:

- Bachelors' degree in Computer Science or related field
- Demonstrated Java skills with proficiency in REST APIs, JSON data, multi-thread large scale data processing, accessing SQL data, and working on a web based platforms
- 4+ years' experience with Java in an enterprise class environment
- Skilled in Agile development methodologies (including unit testing and continuous integration)
- Great attitude!
- Bonus Points!
 - Experience using JIRA and Confluence
